## **DETAILED ACTION**

### ***Response to Amendment***

1. The indicated allowability of claim 21 is withdrawn in view of the newly discovered reference(s) to Edwards (US Patent 6,947,490 B1). Rejections based on the newly cited reference(s) follow.

### ***Claim Objections***

2. Claim 21 is objected to because of the following informalities: On line 2, the phrase "a receiver for a signaling channel" has a grammatical error. The examiner suggested the phrase should change to "a receiver for **receiving** a signaling channel". Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Art Unit: 2616

4. Claim 21 is rejected under 35 U.S.C. 102(e) as being anticipated by Edwards et al (US Patent 6,947,490 B1).

Regarding to claim 21, Edwards discloses a subscriber station CPE 311 comprising a receiver 310 for receiving a signaling channel, a voice channel and a data channel (fig. 10 col. 7 lines 14-30) and a processor 128 connected to the receiver 310 and configured to adjust demodulation and forward error correction rates of packets received over the voice channel and the data channel during successive time periods (fig. 11 col. 12 lines 1-4), the adjusting based on instructions received over the signaling channel that correspond to power allocations made by a base station transmitting the channels (col. 10 lines 55-67).

***Allowable Subject Matter***

5. Claims 1-5, 10-16, and 19 are allowed.
